

Certificate Programme in Lighting Design

Light is an integral part of our everyday life and intelligent use of light for creative and arts industry has become indispensable. In our country, technicians and designers of light learn from their career and experience rather than being formally trained at an institution of quality and expertise. The requirement of qualified professionals in the field is increasing and yet we do not have an institution for training professionals in the field. Light is the inevitable part of our daily life and the dimensions and mood of our life can be changed depending on the light that is provided.

The "Certificate Programme in Lighting Design" can change the focus of life of the course aspirant in a positive manner through the varied and vast job opportunities. There is so much to be explored in the lighting industry in India and abroad. A light designer with an aesthetic sense and knowledge of the trade can enhance the visibility and quality of the performance, whether it is theatre, dance or even architectural lighting. There is a very high demand of light designers nowadays but qualified and trained designers are lacking. This is mainly due to lack of institutions which provide light designing courses. Through this course, knowledge is imparted for aspirants both in the creative and technical side. Students will learn how creativity and technical knowhow can be put together in an efficient manner to produce the best outcome. To put it simply, aspirants will learn how to apply their art and craft in light designing.

This newly designed certificate programme is specially developed for those who have passion along with creative sense and technical knowledge. After completing this 6 months programme, you can easily be a professional lighting designer, either through self-employment or working for an institution dedicated for lighting design in India or abroad. This area is still not explored fully and the opportunities in front of the programme aspirant are vast.
