7.31 Diploma in Montessori Teacher Training

Montessori education is an educational approach developed by an Italian physician and educator, Dr. Maria Montessori. It is based on self-directed activity, hands-on learning and collaborative work. In Montessori classrooms children make creative choices in their learning, while the classroom and the teacher offer age-appropriate activities to guide the learning.

process. Children work in groups and individually to discover and explore knowledge of the world and to develop their maximum potential. It nurtures each child's individual strengths and interests. English medium schools are searching for appropriately trained nursery/KG/ Kindergarten teachers with good communication skills. Government and aided schools are also running pre-school classes supported by the PTA. SRC Community College is organizing a well-planned course with an internationally accepted curriculum which helps thousands of educated and unemployed women. The trained women can run their own child care centers/ Montessori schools. But the trained teachers are very less.
